Due to recent changes by the Drug Enforcement Agency and the Arkansas Medical Board concerning pain medication refills; we are forced to make the following changes to our medication policy.

If a patient is under the guidance of a pain management physician, we will not prescribe any medications at any time for that patient. The patient will need to continue receiving prescriptions from that physician.

If a patient is undergoing surgery and is not currently being treated by a pain management physician, we will prescribe pain medications for two (2) months after surgery only.

There will be little or no exceptions to this policy.
